

30 Day Construction Notice: Westside Pump Station Reliability Project

Description: The Westside Pump Station (WSS) is an all-weather facility that pumps the sanitary and stormwater flow from the west side of the City to the Oceanside Treatment Plant. The WSS and associated facilities have been in service for numerous decades in the harsh marine environment. As part of the Sewer System Improvement Program, the San Francisco Public Utilities Commission (SFPUC) will implement improvements and modifications to ensure the WSS is reliable and operationally flexible, that it contains equipment redundancy, and remains compliant with State and Federal regulations.

Contact: SFPUC Communications, (888) 801-2661, ssip@sfwater.org. After hours: Billy Robowski, Anvil Builders, (408) 410-6068.

When: The anticipated start date for construction is April 2021 with completion scheduled for winter 2024. Weather and/or construction issues may impact the schedule. Workdays and hours (weather permitting) are Monday – Friday, 7:00 a.m. to 4:00 p.m. Some night work and weekend work may be required, in which case advanced notice will be given.

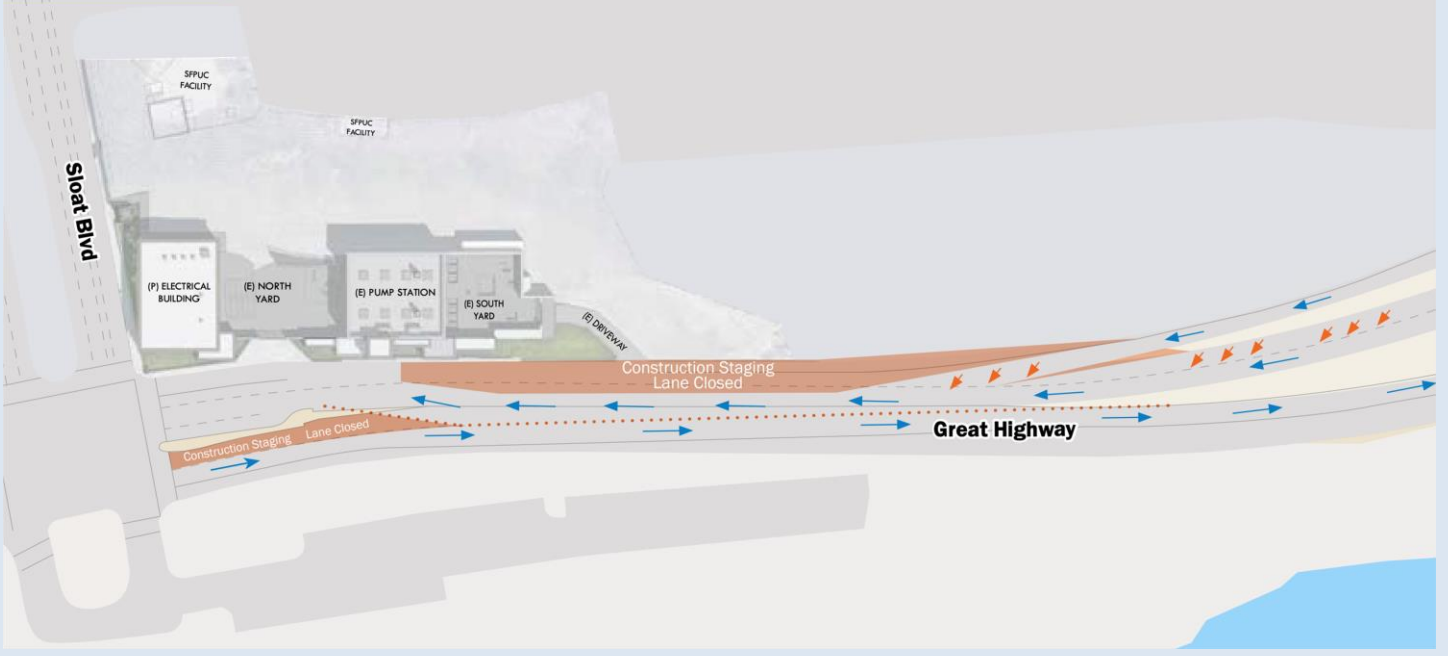

Where: Construction activities will occur within the footprint of the WSS, subsurface structures along the Great Highway, and temporarily along Sloat Boulevard between the Great Highway and Skyline Boulevard.

What to expect:

- While the contractor is required to abide by the City's noise and vibration ordinances, neighbors should expect some noise and limited dust during this work. The project team will work to minimize disruption to normal neighborhood activity; however, there will be occasional inconveniences due to heavy equipment movement and other construction activities
- Through traffic and street parking during the work activities along Sloat Boulevard will remain open
- Construction activities and staging of equipment will be present adjacent to the WSS along the northbound lane of the Great Highway. Northbound and southbound traffic along the Great Highway between Sloat and Skyline boulevards will remain open
- Businesses and residents in the work zone will maintain access to their properties (including entries, driveways, garages), although there may be temporary delays
- Parking will be restricted in the work zone. Please see posted signs for exact details
- No interruption in sewer service is expected during construction

Sewer improvements are funded through the Sewer System Improvement Program (SSIP) – a 20-year, multi-billion dollar citywide investment required to upgrade our aging sewer infrastructure to ensure a reliable and seismically safe sewer system now and for generations to come. For more information visit sfpuc.org/SSIP.
