

Important Information About Remaining GoSolarSF Funding

Thank you for your participation in the GoSolarSF program. This year has been difficult for all of us and we thank and wish all our installers the very best in getting through this difficult time.

Due to a recent but welcomed surge in applications, GoSolarSF funding is running low and most incentive categories are now closed. Available funding is posted each month online in the [GoSolarSF Tracker](#).

Currently, only the low-income DAC-SASH incentive category remains available. All other categories are now fully subscribed and closed.

Please take note of the following to help navigate the program as final program funds become fully subscribed.

January 2021 Handbook

This Handbook is being updated and maintained to serve categories with remaining funding and currently enrolled applicants.

The handbook will capture the program's planned \$100/kW reductions of certain incentive categories that have been scheduled to reach \$0 in January 2021. While these new rates will be included in this handbook update, incentives are subject to available funding and at this time nearly all incentive categories are closed due to being fully subscribed (as noted above).

2020 Incentive Rate Lock-ins

Submission of an application, whether complete or not, locks in the incentive rate offered at the time of submission. However, if an application is deemed incomplete, the missing or additional information must be submitted with the 30-day submission time period to retain the initial submitted incentive rate.

Securing a Reservation from Remaining Funding

Note that Incentive Reservations are provided on a first come first serve basis. Incentive Reservations are queued and issued only upon receipt and processing of complete applications on a first come first serve basis. Incomplete applications do not constitute or establish a funding reservation queue position or entitlement. If an application obtains an incomplete status for a category that will end or is low in funding, we strongly advise applicants to complete the application as soon as possible.

Incentive Category Closeout Process

When submitting applications, please first check the online [GoSolarSF Tracker](#) for available funding and incentive categories that have closed.

Once a category's funding is fully subscribed, the GoSolarSF Tracker will show \$0 remaining and note the category as closed. Funding reservations are subject to available funding and will no longer be issued for applications submitted after its incentive category is closed.

The SFPUC and the GoSolarSF team are very pleased to serve you and we appreciate your participation in this program. Thank you, and please feel free to call us if you have any questions.
