**SHEET NOTES:**

1. "MOUNTING BRACKET ASSEMBLY" shall be fabricated of mild steel, as specified, except as noted. The bracket assembly shall be fabricated to the specifications and tolerances provided in this drawing. All fabrication shall be performed in accordance with good fabrication practices.

2. "BRACKET" shall be fabricated of mild steel, as specified, except as noted. The bracket shall be fabricated to the specifications and tolerances provided in this drawing. All fabrication shall be performed in accordance with good fabrication practices.

3. "LEAD AND/or CABLE" shall be fabricated of mild steel, as specified, except as noted. The lead and/or cable shall be fabricated to the specifications and tolerances provided in this drawing. All fabrication shall be performed in accordance with good fabrication practices.

4. "WIRING" shall be fabricated of mild steel, as specified, except as noted. The wiring shall be fabricated to the specifications and tolerances provided in this drawing. All fabrication shall be performed in accordance with good fabrication practices.

5. "WIRE" shall be fabricated of mild steel, as specified, except as noted. The wire shall be fabricated to the specifications and tolerances provided in this drawing. All fabrication shall be performed in accordance with good fabrication practices.

6. "NIPPLE" shall be fabricated of mild steel, as specified, except as noted. The nipple shall be fabricated to the specifications and tolerances provided in this drawing. All fabrication shall be performed in accordance with good fabrication practices.

7. "PLATE" shall be fabricated of mild steel, as specified, except as noted. The plate shall be fabricated to the specifications and tolerances provided in this drawing. All fabrication shall be performed in accordance with good fabrication practices.

8. "HEX NUT" shall be fabricated of mild steel, as specified, except as noted. The hex nut shall be fabricated to the specifications and tolerances provided in this drawing. All fabrication shall be performed in accordance with good fabrication practices.

9. "WASHER" shall be fabricated of mild steel, as specified, except as noted. The washer shall be fabricated to the specifications and tolerances provided in this drawing. All fabrication shall be performed in accordance with good fabrication practices.

10. "PISTON" shall be fabricated of mild steel, as specified, except as noted. The piston shall be fabricated to the specifications and tolerances provided in this drawing. All fabrication shall be performed in accordance with good fabrication practices.

11. "SHIELD" shall be fabricated of mild steel, as specified, except as noted. The shield shall be fabricated to the specifications and tolerances provided in this drawing. All fabrication shall be performed in accordance with good fabrication practices.

12. "GASKET" shall be fabricated of mild steel, as specified, except as noted. The gasket shall be fabricated to the specifications and tolerances provided in this drawing. All fabrication shall be performed in accordance with good fabrication practices.

13. "SCREW" shall be fabricated of mild steel, as specified, except as noted. The screw shall be fabricated to the specifications and tolerances provided in this drawing. All fabrication shall be performed in accordance with good fabrication practices.

14. "SPRING" shall be fabricated of mild steel, as specified, except as noted. The spring shall be fabricated to the specifications and tolerances provided in this drawing. All fabrication shall be performed in accordance with good fabrication practices.

15. "PLATE" shall be fabricated of mild steel, as specified, except as noted. The plate shall be fabricated to the specifications and tolerances provided in this drawing. All fabrication shall be performed in accordance with good fabrication practices.
